

These are original hand-drawn parcel maps of the province of Barcelona. They are from the Escola de la Llotja in Barcelona, where surveying was taught until the mid-19th century. Elies Rogent put together this collection from private collections of surveyor-architects such as Carlos Gaurán, Jean-Antoine Laur, Joan Soler i Mestres, Tomás Soler i Ferrer and Miquel Garriga i Roca. The collection reveals the historical development of land use and spatial development in municipalities such as Manresa, Martorell, Molins de Rei, Sant Sadurní d'Anoia, Sitges, Vic, Vilafranca del Penedès and the city of Barcelona. The archive also has a collection of handwritten and printed maps.

The collection includes 96 documents, many of them accessible in the [Digital Memory of Catalonia](#).

3. Maps by surveyors and other old maps (1751-1904)

**Maps by surveyors and other
old maps (1751-1904)**

Cardoso, Joseph. *Geodesic Plan of Barcelona*, 1700. AG-012851.
